

Stop measuring power by the puddle under your trainer.

CYCLEOPS 2010

ROAD SEASON. ROAD BIKE. CROSS SEASON. CROSS BIKE. ANY SEASON. INDOOR BIKE.

Introducing the all-new line of CycleOps Pro Series indoor cycling products. Developed for the most demanding cyclists indoors and out.

Because you demand a great fit, Pro Series indoor cycles incorporate four points of micro adjustment. Because you expect a highly effective workout, they offer precise resistance control. You also want a bike that lets you sprint. So frame stiffness and stability is second to none. In essence, you want every aspect of your indoor cycle to duplicate the experience of riding outdoors. That's why all Pro Series indoor cycles come with freewheel gearing so you can coast whenever your pace dictates to recover between efforts.

As the category leader for more than 10 years, the CycleOps Pro Series line of trainers reflects everything we have learned about bringing the power of riding outside, inside. Featuring Powertuned Technology, this premium line offers a trainer for every kind of rider and every kind of ride.

Get a CycleOps Pro Series indoor cycling product dedicated to giving you the ultimate indoor workout.

THE ULTIMATE INDOOR PERFORMANCE SOLUTION.

The 400 Pro is the evolution of everything we know about cycling performance at CycleOps. It combines ten years of research and development in the category, listening to cyclists of all levels. And what we all share is the craving to re-live that epic ride. Now we can, with the 400 Pro you can recreate any ride captured on your Joule. On any day, any season, in any weather, any time.

Riding your favorite course doesn't have to be weather or traffic dependent anymore. The 400 Pro uses electronic resistance control technology, making it possible to duplicate the most extreme grades and allowing you to try different gear combinations for optimum pacing strategies.

PowerTap technology gives users precise feedback on their workouts so they know they are achieving their goals. Joule takes workout metrics to a whole new level, managing performance data with dashboard functions, ride reports, history and workouts. The Pro Series frame offers freewheel gearing and allows you to quickly adjust all geometries necessary for creating the perfect fit.

400Pro

- Duplicate the demands of a race or ride
- Control target power, slope or gearing with dedicated resistance control
- PowerTap technology provides +/-1.5% accurate power feedback
- Four points of micro adjustment to duplicate the fit of your outdoor bike.
